Tornado Hits City, Damage Heavy

Curious Public Hampers Work After Tornado

Holloway Praises CD Workers, Cites Need for Future

By BOB WHITE Press-Gazette Staff Writer

Brown County sherifftraffic officers, city police, firemen, volunteer rescue squads, civil defense workers, and other emergency personnel today began the huge task of cleaning up debris in the wake of the first tornado in Green Bay area history.

At mid-morning, the efforts of damage assessment and repair were badly hampered by curious county residents who parked their automobiles in critical areas and simultaneously endangered their own safety by walking in places where hot utility wires were down.

"I'll never know why someone wasn't killed," said County Civil Defense Coordinator John Holloway after a tour of storm-stricken Preble, Ashwaubenon, and Northeast Green Bay late this morning.

Holloway, inspecting tornado damage with Sheriff Artley Skenandore and County Board Chairman severely impaired cleanup Service Corp. linemen, and others.

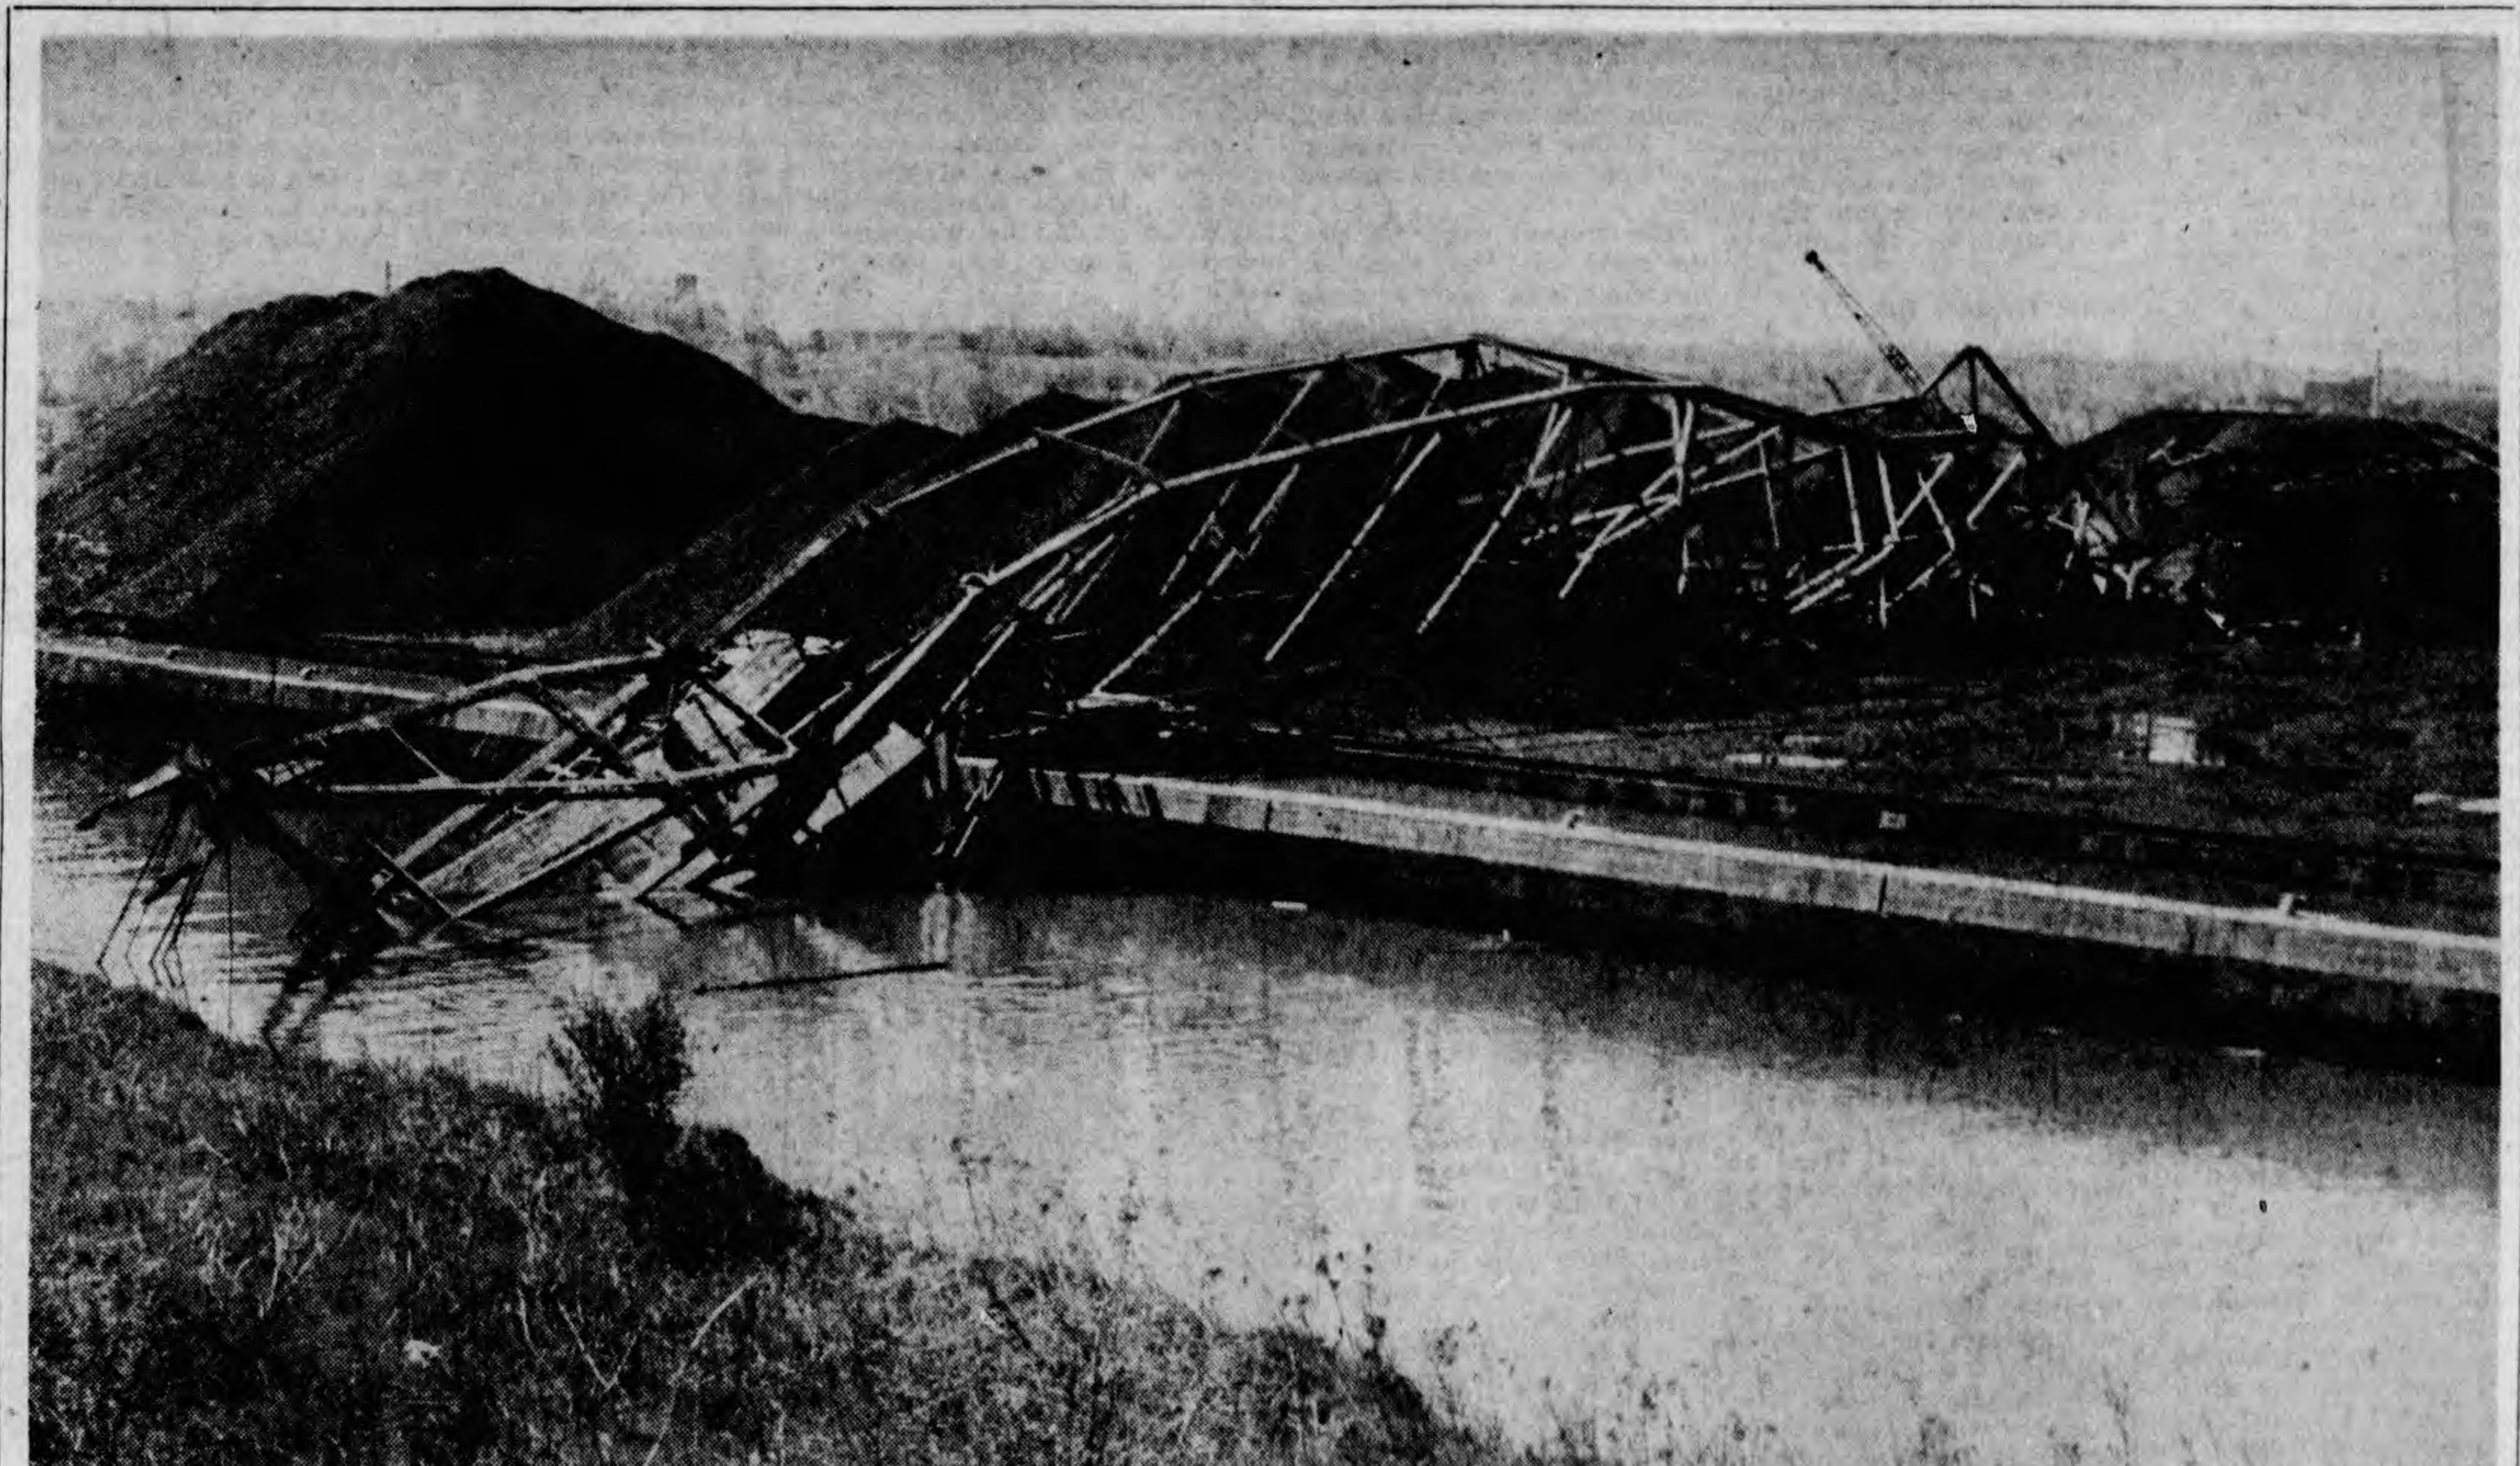

"You just wouldn't believe there were that many automobiles in Brown County," Holloway said in reference to the

curiosity seekers. tor added that actions of the curious public "could someday create complete havoc in the event of a major natural dis-

aster here." Praises CD Crews

While expressing disappointment over the public's general disregard for life and limb, Holloway conversely could not find enough good things to say about civil defense personnel and other volunteers such as the De Pere Rescue Squad.

Report Only Three Injuries, None Serious

Home, Businesses Destroyed as Winds Follow Narrow Path

By JANET SKRIVSETH Press-Gazette Staff Writer

A tornado which cut a narrow path through Ashwaubenon, Green Bay and Preble Sunday night caused hundreds of thousands of dollars of damage and injured at least three persons, none seriously.

An accurate estimate of the damage was unobtainable today, but it was extensive. At least six homes were demolished. Countless homes were damaged, one estimate placing the figure of the most severely hit at 50.

Many business places, warehouses, and similar buildings were destroyed. A Reiss Coal Co. bridge at Dock No. 2 on State Street was blown into Fox River. Many trees were blown down.

Three women were injured, but not seriously. They were: Miss Lillian Bartel, 1246 E. Mason St., injured eye; Miss Jacqueline Lewis, 1723 Willow St., shock; and Mrs. Joseph Kutska, 555 Henry St., chest injury and shock. All three were hospitalized.

Worst Since 1944

Both the Wisconsin Public Service Corp. and the Wisconsin Telephone Co. reported widespread damage. No estimate of the damage to the Public Service lines was available but it was said to have been in the thousands of dollars and the worst since a strong wind which hit Green phone Co. said there was at least \$25,000 worth of damage to its equipment.

The storm will go down on first on record in Green Bay.

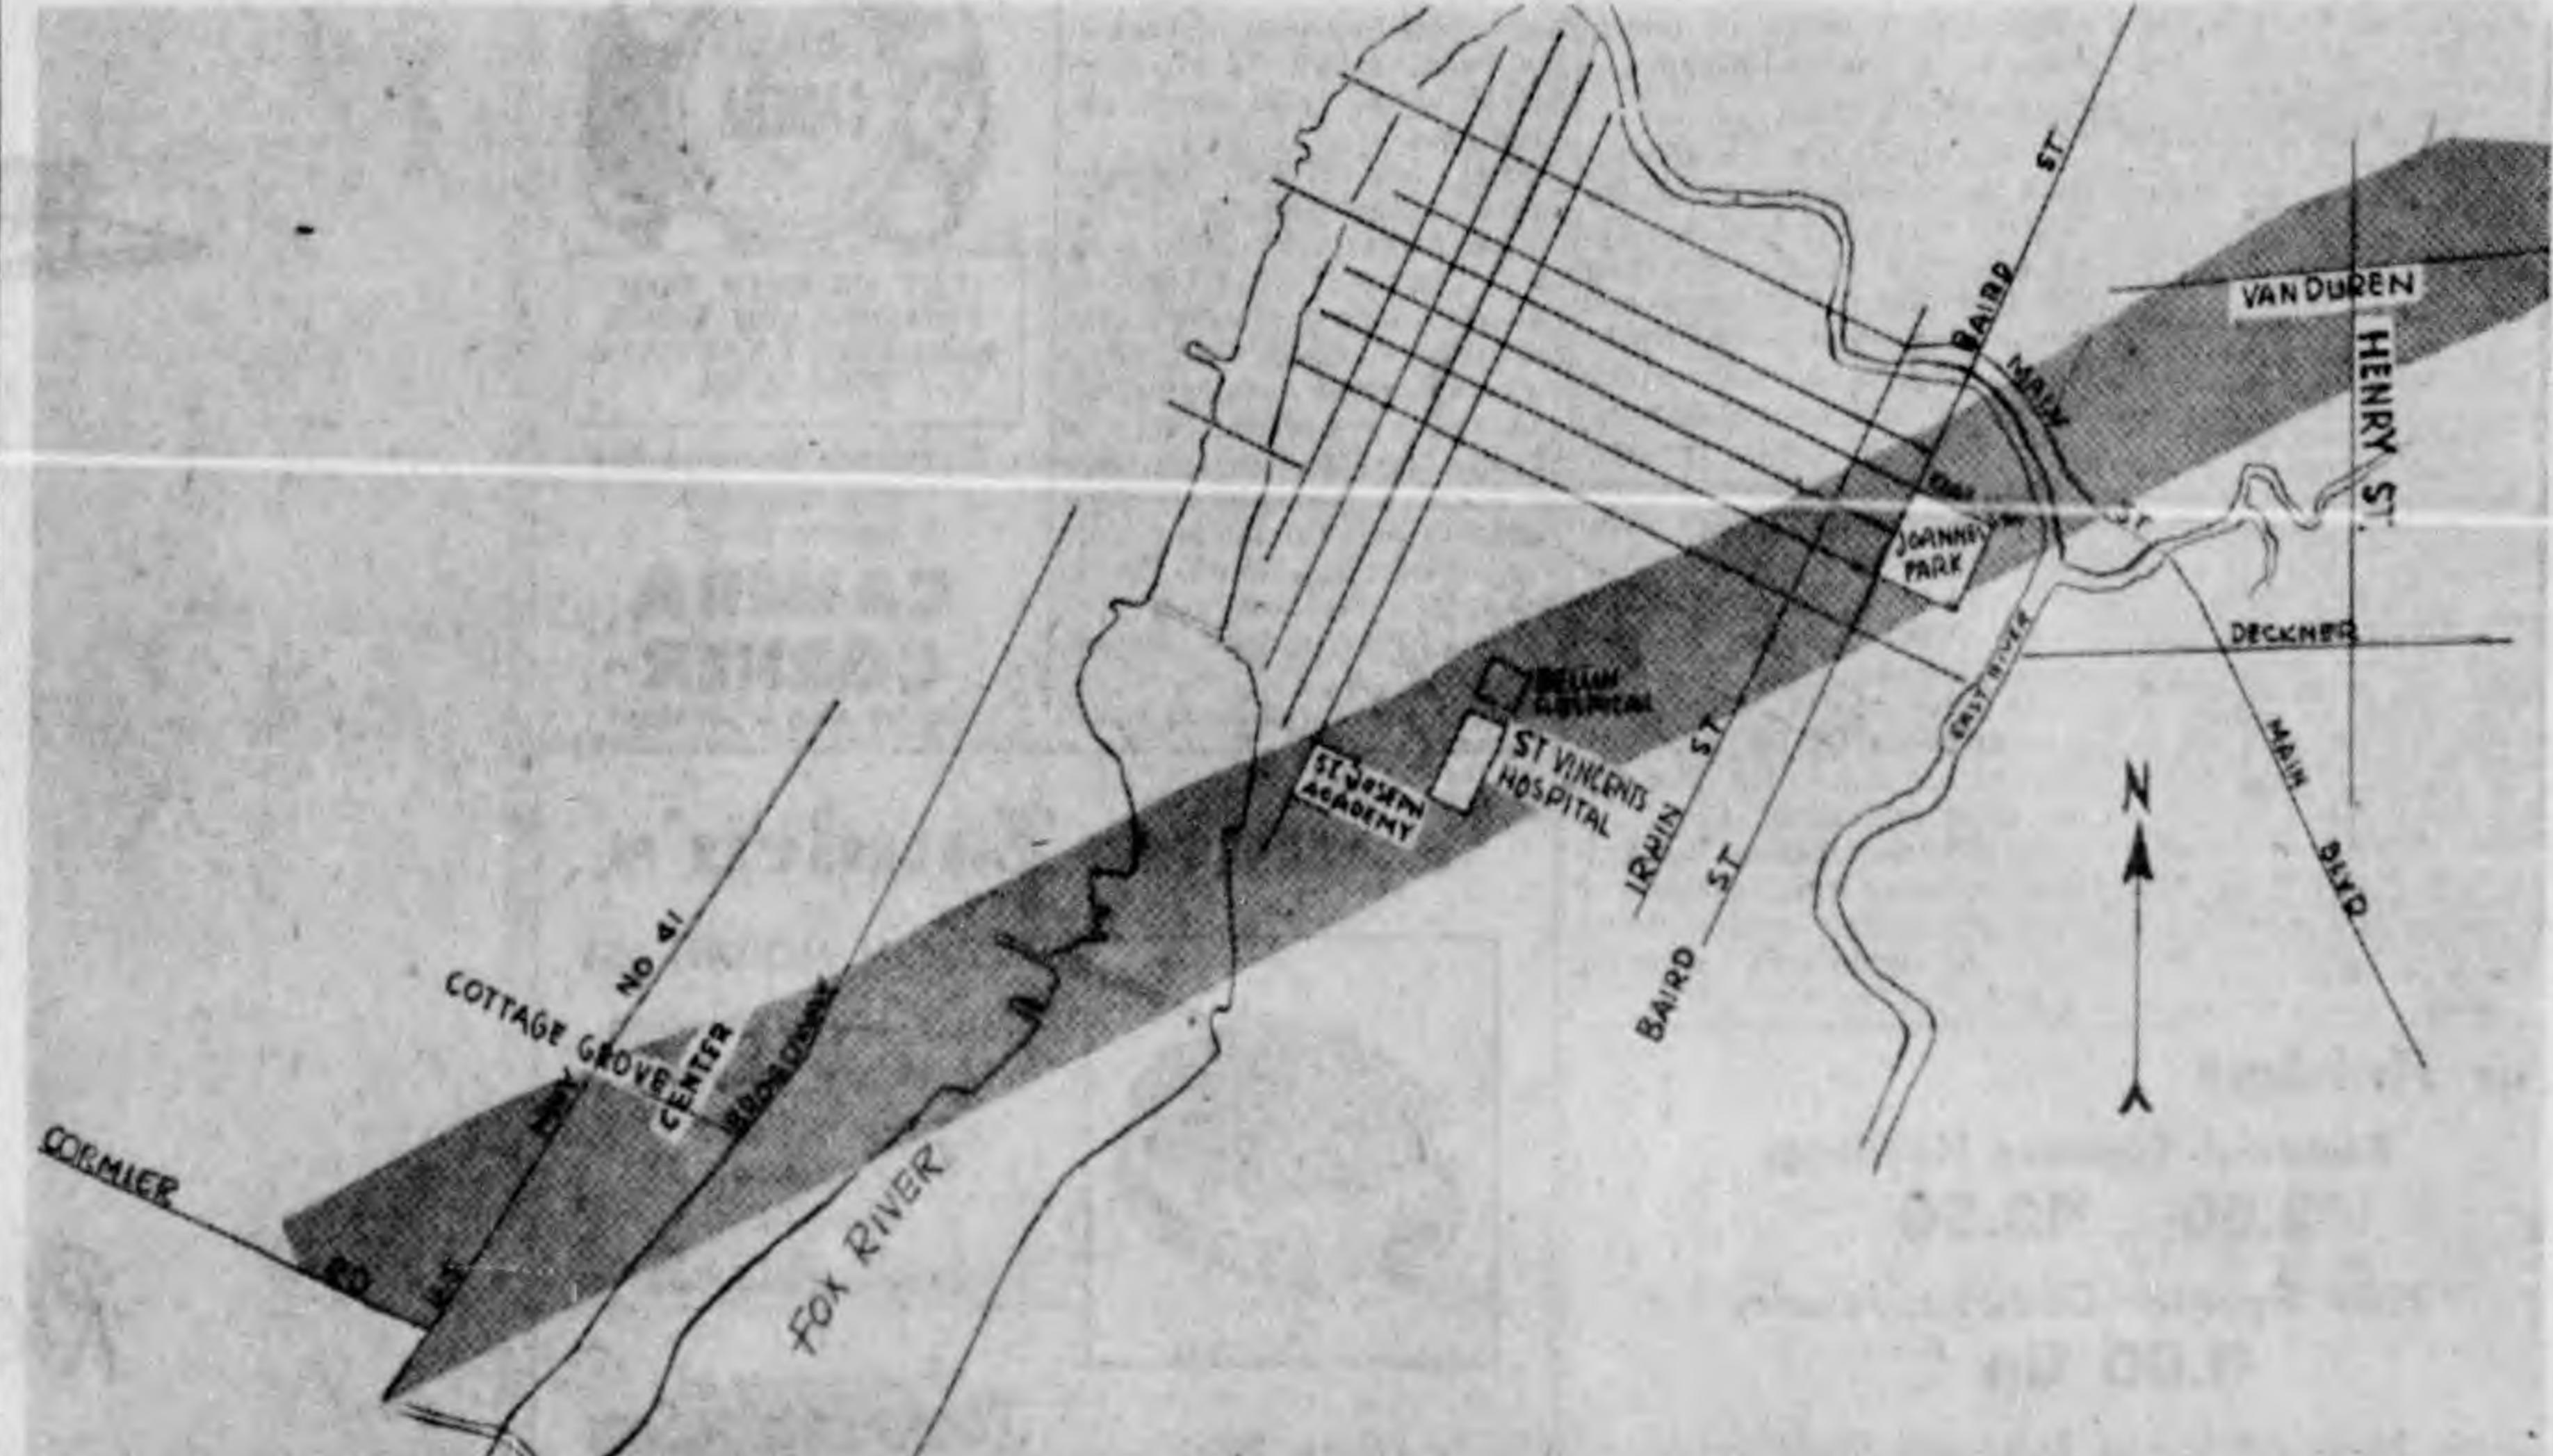

The determination that the storm was a tornado was made by Weatherman Herb Bomalaski, who was called back from vacation this morning.

An airplane flight over the stricken area showed that there was every indication that the storm was a tornado, Bom-

thunderstorm and moved to

Erle Stanley Gardner was one of the first to discover what a tremendous advantage in both comfort and clarity "Target Hearing" brings to an active person. "I can't begin to tell you how much satisfaction I get out of it", Erle Stanley Gardner, creator of "Perry Mason", says, "I think more people should realize the extent to which recent scientific discoveries can help in restoring lost hearing, just as glasses can sharpen dim vision". Like Mr. Gardner, you'll be amazed at the ease and clarity with which Otarion's exclusive, patented "Target Hearing" lets you hear where you look. You'll be amazed, too, when you discover that with "Target Hearing" even your best friends may not know you're wearing a hearing aid unless you tell them. There are no irritating, old fashioned cords or wires in your hair or clothing, no unsightly "blobs" behind your ear. With revolutionary "Target Hearing" a tiny, almost invisible tube leading to your ear brings you a whole, wonderful world of sound without the annoyance of unwanted "background" noises. Stop in today for a FREE test of your hearing-and try Otarion's fabulous "Target Hearing" for

yourself. You'll be under no obligation,
